** 2017 saw the introduction of Levels 9-1 in English and Maths. A level 9-4 is comparable to the A*-C used in previous years.

* 2014 – 2016 GCSE results are not directly comparable with results from earlier years, as both the way in which the whole school results were calculated and the manner in which the students were assessed were different prior to 2014. **However from 2016 we are now able to present trends for the last three years based on the new calculations.** The national figure for the number of students gaining 5A*-C including English and Maths in 2016 was 57%.

**The results reported above do not include the full range of qualifications gained by the students.
